

Integrazione nella Specifica tecnica della pagina 18

Oggetto: Gara europea a procedura negoziata con bando per Acquisizione, installazione ed integrazione di un tool di supporto al sequenziamento degli arrivi sugli aeroporti maggiori (Arrival Manager).

In relazione alla gara in oggetto si rappresenta che nella Specifica tecnica posta a base di gara a causa di una anomalia del file PDF manca la pagina 18.

La suddetta pagina è riportata in calce alla presente e costituisce parte integrante della Specifica tecnica di cui alla documentazione di gara.

Il Responsabile Funzione Acquisti
F.to Giovanni Vasta

Area Tecnica

3. Deployment in OPS environment of **Clients**.
4. Support for Transition Plan to OPS environment – “Ready for operation” with **Clients**.

In Addition a Deployment in SIM environment of **Reduced Platform/Clients** at ENAV ACADEMY shall be scheduled.

6.6 INTEGRATION IN PSA ROOMS

The aim of this activity is the verification of all the implemented functionalities in the system inside a Pre-Operational testing Environment. Suppliers shall install an HW/SW platform in complete configuration (redundant cluster) which shall be feed with operational traffic data (recorded, simulated or repeated from operational environment).

The platform shall run in both shadow mode, fed by live traffic data through gateways (flight plan and surveillance data) and simulated mode, fed by simulated traffic data (flight plan and surveillance data) .

ATRES system (Techno Sky's simulation platform) shall be used as tool of ATM traffic generator to create operational scenarios with coherent and controlled data and with expected output results.

Suppliers shall provide Network and Power Supply needs in order to be connected on existing infrastructure.
