

AERONAUTICAL INFORMATION

» Drawing on our experience as Italy's Aeronautical Information Service Provider (AISP), we can support both data/information originators and other AISPs in analysing their current process and scenario support customers and their stakeholders in developing solutions and plans for the migration from AIS to AIM as an end-to-end solution concept.

The service is aimed at creating and managing aeronautical publications dedicated to specific categories of aeronautical users and AIS publications on behalf of other States, as provided for in ICAO Annex 15.

ENAV, as an AISP certified (ISO 9001: 2015 and Reg.UE 2017/373) for the management of aeronautical publications (AIP, AIC, eAIP, EAD data provision) and "ad hoc" publications (VFR Manual, Manual for Recreational Aviation, etc.) can deploy high skilled dedicated staff using the most advanced equipment available to support originators and/or AISPs in the collection and management of aeronautical information and data, in the verification and validation of aeronautical data, in planning AIP amendments, drafting of amendments and their quality control, and in the publication of AIP, eAIP, EAD data provision and for dedicated aeronautical publications (VFR, ULM, Sports Aviation).
